## Description

ARLN-5281 is a groundbreaking medication, a lifesaving treatment for people with rare growth hormone deficiencies. It literally changed people's lives. And to celebrate and reward the researchers, this simple

custom Lucite award was commissioned.

It contains an actual sample of the peptides used. They are preserved forever in the Lucite. The clear Lucite keeps the vial and conveys the date for which this was released. Aileron was very pleased with how quickly we produced this project for them.
